Noncommercial help for pedestrians and bicyclists

## IF YOU ARE HIT BY A CAR IN NEW YORK

- **DO NOT MOVE** or allow others to move you, especially if you feel pain in your neck or back.
- Only a doctor, paramedic, or emergency medical technician may give first aid. (NYPD Patrol Guide §217-01.)
- Ask bystanders to gather facts and witness phone numbers. Speak without nodding or moving your head.
- Write down what happened to you, or ask others to, and give to or tell the EMTs.
- Don't admit fault or speculate on the extent of your injuries.
- Wait for police or ambulance. If you suspect even a minor injury, say so, and insist that police write a Police Accident Report (MV-104AN). Get the report number.
- Seek medical and legal help. Ask a family member or close friend to be your advocate.
- Go to the hospital or doctor right away. Even without symptoms, you may be injured. The car owner's No-Fault insurance will pay the bills. MVAIC may pay for hit-and-runs.

## IF YOU WITNESS A CRASH

- Call 911 with the exact location. Write down what happened to victim to help EMT assess injury.
- Get car license and witness phone numbers
- Divert traffic. But don't endanger yourself. EMTs don't want more victims.
- Do not lift or move crash victim (unless **immediate** danger outweighs risk of permanently disabling the patient).
